

Lecture 3.7.2014

1) Download Tomcat (version apache-tomcat-7.0.54), binary distribution

<http://tomcat.apache.org/download-70.cgi>

PREREQUISITES:

Download and Install a Java SE Runtime Environment (JRE): version 6 or later

Set environment the following environment variables (paths are only examples):

- CATALINA_HOME: C:\tomcat\apache-tomcat-7.0.54-windows-x64\apache-tomcat-7.0.54
- JAVA_HOME: C:\Program Files\Java\jdk1.7.0_51

Check if Tomcat is running properly: <http://localhost:8080/>

2) Download Sesame, current version (2.7.12), openrdf-sesame-2.X.X-sdk.zip:

<http://sourceforge.net/projects/sesame/files/Sesame%20/>

3) Deploy Sesame:

copy

openrdf-sesame.war

openrdf-workbench.war

from

C:\[PATH TO SESAME]\openrdf-sesame-2.X.X-sdk\war

To

C:\ [PATH TO TOMCAT]\webapps

The folders for each webapp will appear if deploy correctly.

Try <http://localhost:8080/openrdf-sesame/home/overview.view> and <http://localhost:8080/openrdf-workbench/repositories>

Sesame documentation:
